SHANGHAI CHONGMING

WORLD-CLASS ECO-ISLAND

PREFACE

For thousands of years, rivers and seas, waves and tides gave birth to the Chongming Island, the largest estuarine alluvial island throughout the world, and Changxing and Hengsha islands under the jurisdiction of Chongming. Chongming Dongtan is a post station of migratory birds and a kidney of the earth; Xisha Wetland embraces the river flowing into the sea and sprinkles “gold” in the sunset; In the hinterland of Dongping, there are lush forests to jointly compose a natural oxygen bar; An area of 1,400 square kilometers, here, the breeze blows, the green water flows, the fertile fields are lush and the four seasons are beautiful. Chongming, a world-class ecological island with best sceneries, is famous at home and abroad.

The Outline of the Development Plan for Chongming World-class Ecological Island (2021-2035) proposes that by 2035, Chongming World-class Ecological Island will be built into:

A green ecological “bridgehead”、A green production “pilot area”、A green life “demonstration area”.

Chongming has become a brand name of national ecological civilization that leads the country and affects the world, a benchmark of green development of the Yangtze River and a model of people's happy life and shown the world an example of the construction of “harmonious coexistence between human and nature”.

REGIONAL OVERVIEW

Location: Chongming District, located at the mouth of the thousands of miles of the Yangtze River, intersects with the southeast coastal thoroughfare. It is mainly composed of Chongming, Changxing and Hengsha islands, with a land area of 1,413 square kilometers, including 1,269 square kilometers of Chongming Island, which is the largest estuarine alluvial island throughout the world and the third largest island in China.

Chongming District governs 16 towns and two townships, with a total registered resident population of about 670,000.

With 1/5 of the land area of Shanghai, Chongming carries about 1/4 of the forest, 1/3 of the basic farmland and two core water sources in Shanghai. It is an important strategic space for the sustainable development of Shanghai in the 21st century.

ECOLOGICAL ENVIRONMENT

Located in the subtropical zone of the northern hemisphere, Chongming has a typical marine climate, mild and humid. It is 100% up to standard for surface water environmental function zones in the whole district. The percentage of days with “excellent” air quality index (AQI) reaches 88.7% in 2022. The forest coverage rate has reached 30.62% and the ecological environment quality is among the best in the city.

CONSTRUCTION TIMELINE

On May 18, 2005, the administrative regions of Changxing and Hengsha, originally belonging to Baoshan District of Shanghai, were integrated into Chongming County.

On October 31, 2009, the Shanghai Yangtze River Tunnel and Bridge was officially opened to traffic and Chongming Island was since then connected with the land of Shanghai.

On March 10, 2014, the United Nations Environment Programme published its evaluation report on the ecological status of Chongming Island in Shanghai, which was included in the United Nations green economy textbook as a best practice and recommended to 42 island countries throughout the world.

In July 2016, Chongming was upgraded from a county to a district.

In 2001, the municipal government issued the Shanghai Urban Master Plan (1999-2020), positioning Chongming Island as an ecological island and opening the way for ecological development.

In 2010, the Shanghai Municipal Government issued the Outline of Chongming Ecological Island Construction (2010-2020), which proposed the indicator system and phased objectives for the construction of Chongming Ecological Island, striving to form a preliminary framework for the construction of Chongming modern ecological island by 2020.

In 2016, the Shanghai Municipal Government issued the 13th Five-Year Plan for the Development of Chongming World-class Ecological Island to promote the construction of Chongming Ecological Island with a higher standard, broader vision, higher level and quality.

From May 21 to July 2, 2021, the 10th China Flower Expo was held in Chongming, which was the first flower event held on an island, in countryside and forest.

In 2022, the Shanghai Municipal Government issued the Outline of the Development Plan

for Chongming World-class Ecological Island (2021-2035), proposing to build Chongming World-class Ecological Island into a "bridgehead" of green ecology, a "pilot area" of green production and a "demonstration area" of green life by 2035.

MASTER PLAN

By 2035, Chongming will be built into a world-class ecological island with a leading and exemplary role in ecological environment, resource utilization, economic and social development, human settlement quality and other aspects, an important protection area for the diversity of natural resources throughout the world, an important habitat for birds, a demonstration area for the protection of the ecological environment of the Yangtze River and a leading area for the development of national ecological civilization.

In the future of Chongming, the ecological areas are harmonious and natural, the countryside is comfortable and orderly and the towns are compact and intensive. It will present the most organic integration and harmony between towns and villages, between human beings and nature and between ecological protection and construction.

DEVELOPMENT STRATEGY

Cultivate ecological foundation with "+ecology" strategy: +Ecological bottom line、+Ecological resources、+Ecological network、+Ecological node、+Ecological restoration.

Promote ecological value with "ecological+" strategy: Ecology+vitality、Ecology+power、Ecology+charm.

ECOLOGICAL PATTERN

Plan to form the overall ecological spatial structure of "five sources and multiple corridors".

Five sources: Dongtan, Xisha, Beihu, Dongping National Forest Park, Changxing Qingcaoshan Wetland and other five important ecological sources.

Multiple corridors: including one municipal ecological corridor and 10 district-level ecological corridors, connecting the basic ecological areas and important ecological sources and building the ecological trunk line network of Chongming District.

Chongming Dongtan Birds National Nature Reserve, Shanghai

easternmost end of Chongming Island, Shanghai Chongming Dongtan Birds National Nature Reserve, with a total area of 241.55 square kilometers, is one of the largest and most typical estuarine tidal flat wetlands in China. It was on the list of international important wetlands by the secretariat of the Convention on Wetlands in 2002. The Reserve is an ecologically sensitive area of international significance and plays an important role in

the migration area of migratory birds in East Asia and Australia. It is an important stopover, wintering and breeding place for migratory birds. It plays an important role in maintaining the life process of migratory bird populations. It is also an important migration channel and breeding place for aquatic organisms in the Yangtze River system and the East China Sea. The reserve is rich in animal and plant resources, with up to 300 species of birds recorded, including 19 endangered species under special state protection, including black-headed gulls, white-headed cranes and black-faced spoonbills and 59 national second-class protected species, including swans, geese and mandarin ducks. Over 1 million migratory waterfowls inhabit or transit in the reserve every year. As the habitat of migratory birds in the Yellow (Bohai) Sea of China (Phase II), it has been declared as a world heritage.

Shanghai Aquatic Wildlife Conservation and Research Center

Acipenser sinensis or Chinese sturgeon is a large anadromous migratory fish endemic to China and is a wild animal under special state protection. The Yangtze River Estuary is an important ecological sensitive area in the world. It is the only natural and concentrated habitat of Chinese sturgeon in its life cycle, where the most of them will spend the longest time but are the most vulnerable. It plays an exclusive, unique and irreplaceable role. Shanghai has set up the Shanghai Aquatic Wildlife Conservation and Research Center at the eastern end of Chongming Island to rescue rare aquatic creatures such as Chinese sturgeon, which has achieved remarkable results. It has become a veritable "first aid for aquatic animals", established an ecological environment quality monitoring system, continued to carry out natural resources investigation and environmental monitoring of Chinese sturgeon, explored the way to construct the Yangtze River Estuary Marine Pasture Demonstration Area and created a new model for ecological restoration of the estuary. It was announced by the Ministry of Agriculture and Rural Affairs as a national marine pasture demonstration area.

Xisha Mingzhu Lake

Located at the southwest end of Chongming Island, Xisha Mingzhu Lake scenic spot consists of Mingzhu Lake and Xisha Wetland, with a total area of 7.8 square kilometers. The area under the jurisdiction was originally a main channel of the southern branch of the Yangtze River and also the area where Zheng He, a Ming Dynasty navigator, sailed to the west. As a post station of the International Migratory Birds Line 5, the scenic area features unique and beautiful natural scenery of wetlands, lakes, forests and characteristic aquatic sports and leisure tourism, making it a well-known national ecotourism demonstration

area. Xisha Mingzhu Lake scenic spot is being upgraded to become a national 5A tourist attraction.

Dongping National Forest Park

Dongping National Forest Park is located in the north-central part of Chongming Island, with a total area of 360 hectares and a forest coverage rate of 90%. It is a national 4A tourist attraction. Centering on the theme of "Blossom • Chinese Dream", Dongping National Forest Park (South Park of the 10th China Flower Expo) wonderfully deduces the connotation of the artistic conception of "Floral Forest - Happy Life Every Day", highlights the fundament of the fir forest, takes advantages of natural elements to make scenery interesting, flowers in the forest blooming. Featuring rich ecological background, pure natural culture, comfortable health and wellbeing environment, elegant cultural quality, clean energy and low carbon, it will become a "Bouchart style" forest flower garden with friendly service facilities and unique and exquisite landscape and match with the construction of world-class ecological island.

Qingcaosha Reservoir

Qingcaosha Reservoir is located in the water area of the north and south ports of the south branch of the Yangtze River estuary at the northwest of Changxing Island. It is the largest estuarine shoal reservoir in Asia and the main reservoir in Shanghai. Qingcaosha Reservoir was officially completed and put into operation on June 8, 2011. The total raw water supply accounted for more than 50% of the total raw water supply in the city and the beneficiary population was 13 million.

Changxing Island Country Park

Changxing Island Country Park is located at the mouth of the thousands of kilometers long Yangtze River, with an area of 5.56 square kilometers in the first phase. It is the largest country park in Shanghai's first-phase planning and construction. The park is divided into five major areas: comprehensive supporting area, leisure and sports area, agricultural experience area, orange garden folklore area and forest conservation area, all of which are transformed based on ecological fir forest, river bank, orange orchard, fruit forest, farmland and vegetable fields, with the characteristics of "nature, ecology and wildness".

REGIONAL DEVELOPMENT

Chongming Island • East and West Wings

Chongming will take the construction of Chongming Line in the eastern rail transit and Shanghai-Chongqing-Chengdu high-speed railway along the river in the west as the

traction, give full play to the radiation effect of the comprehensive development of Chenjia Town and Chengqiao area, strengthen the construction of the "one station and one city" function, strengthen the new power of development at the east and west ends and accelerate the drive of the east and west wings of Chongming Island to fly together.

Chongming Island • New development in the central area

Chongming will give full play to the spillover effect of the China Flower Expo, promote the extension of the whole industrial chain of flower provenance research and development, production demonstration and flower trading, let the bright flowers bloom "beautiful economy", and drive the accelerated development of the central area of Chongming Island.

The 10th China Flower Expo

From May 21 to July 2, 2021, the 10th China Flower Expo with the theme of "Blossom • Chinese Dream" was held in Chongming. This flower expo is the first flower expo held on an island, in countryside and forest, attracting more than 2 million visitors at home and abroad, and over 24 million online viewers. It is the largest flower expo with the largest park scale, the largest number of exhibition pavilions and the longest exhibition period.

Changxing Island High-end manufacturing

Chongming will firmly grasp the requirements of the high-quality development trend of the marine economy, accelerate the formation of a modern industrial system dominated by marine equipment, with the coordinated development of advanced manufacturing, modern service and emerging industries to build Changxing into a major site of Shanghai manufacturing, an important leader in marine scientific and technological innovation and an important growth pole for high-quality development.

Hengsha Island • Pilot ecological demonstration area

In combination with the construction of the world-class ecological island pilot demonstration area, Chongming will protect the original natural ecological environment of Hengsha and strive to create ecological Hengsha, leisurely Hengsha and original Hengsha with unique charm and idyllic features to retain the island's nostalgia.

TRAFFIC PATTERN

Shanghai-Chongqing-Chengdu High-speed Railway along the Yangtze River, G40 Shanghai-Shaanxi Expressway, Chongming Line of Shanghai Rail Transit, 30 minutes of auto ride from Shanghai Pudong International Airport, 70 minutes of auto ride from Shanghai Hongqiao International Airport, 60 minutes of auto ride from Shanghai Railway Station.

ECOLOGICAL ECONOMY

“2+3+N”

"2" means to focus on the two leading industries of urban modern green agriculture and marine equipment industry, which represent the development level of the world-class ecological island and participate in international competition;

Race Introduction

The Tour of Chongming Island 2026 (UCI Women's WorldTour) is jointly hosted by the International Cycling Union (UCI), General Administration of Sport of China, and Shanghai Municipal People's Government, organized by Chinese Cycling Association, Shanghai Administration of Sports, and Shanghai Chongming District People's Government, and co-organised by Shanghai Cycling Association and Shanghai Max Success Culture and Sports Property Co., Ltd. The event will take place on Shanghai's World-Class Chongming Eco-Island from 9 to 11 October 2026.

Officially sanctioned and recognised by the UCI as a 2.WWT elite women's road cycling race, it is also a national A-level race in China. Its competitive standard is on par with the three flagship multi-stage women's races: the Tour de France Femmes, Giro d'Italia Women and Vuelta a España Femenina. 2026 UCI Women's WorldTour calendar comprises 25 events worldwide, including 10 multi-stage races staged across 10 countries such as Australia, the United Arab Emirates, Italy, Spain and France. The Tour of Chongming Island remains the only multi-stage women's road WorldTour race in China, acting as a core competition platform for women's professional road cycling in Asia. This edition will bring together 13 top teams from around the globe, including UCI Women's WorldTeams and UCI Women's Continental Teams, featuring the world's leading female cyclists.

The total distance of the race is 348.4 km with 3 stages. On 9th October, the first stage (Chongzhong Stage and City Circuit Race) is 110.4km; on 10th October, the second stage (Chongdong Stage) is 129.4km; and on 11th October, the third stage (Chongxi Stage) is 108.6km. The start and finish of the first and third stages is Chongming Xincheng Park. The start of the second stage is Changxing Island Country Park and the finish is also Chongming Xincheng Park.

The event consistently adheres to the core development philosophy of integrating "ecology and sports", and follows the proven event organisation model of "government leadership, public participation and market-based operation", leveraging the world-class cycling race as a distinctive international communication platform. On the one hand, it ensures high standards for the professional competitive level of the event and builds a platform for exchanges in women's cycling between Chinese and international participants. On the other hand, utilising the island-wide race route, the event comprehensively showcases the remarkable achievements of Chongming World-Class Eco-Island in green development, ecological conservation and integrated urban-rural development. It further elevates the influence of Chongming's sports, culture and tourism brand, striving to build a landmark international sports event with distinctive Yangtze River Delta identity.
